*Professional Software for Converting Raster Image Files to PDF*

ELAN Converter™ is high-speed professional software designed to convert raster image files to PDF and other raster file formats. The Converter offers different operating modes and supports "Image Only" and "Image+Text" sub formats.

Multi page TIFF, DCX, PNG, JPG and PDF files are also supported. Merging converted files is supported either by directory of name or a common prefix method.

Product Operation Modes

Batch Mode: Add any number of files to the file selection window and all files are converted to PDF or other file formats in an instant. Sophisticated single page to multipage operation are provided.

Watched Directory Mode: Set up any number of directories with custom parameters for conversion. Files placed in any directories (or sub-directories) will be converted to PDF format.

Command Line Mode: Used for integrating ELAN Converter™ with other applications. Unix-like command line parameters give you wide flexibility for your conversion projects.

Product Features

Automatic, Low-Cost, Mass Conversion

Instant PDF Support	Adds instant PDF support to any scanning application
Automatic Conversion	Converts thousands of files overnight at high speed with NO click-charges
Merging	Merges single-and multi page TIFF files to multi page PDF
