

ELAN Avalanche System v. 2.0.0.186

Release notes

Job Center

- **Improvement:** Multiple files selection feature was improved. Along with using *Ctrl+Click* shortcut available in the previous build, the range of files can be selected/unselected by using *Shift+Click*, *Ctrl+Space* and *Shift+Space* shortcuts.
- **Improvement:** Selecting all files (*Ctrl+A* shortcut) in the Files view became many times faster comparing to previous build.
- **Improvement:** The height of each row in each view in Job Center decreased, so now each view contains 1.5 times more items than it was in the previous build.
- **Improvement:** The frequency of '2100 parameters in SQL query' was reduced.
- **Known issue:** Starting from many thousands of files opening them in QC might fail with '*Timeout expired...*' message. Working on this issue.
- **Known issue:** File ticket copy failed issue has been reproduced on 3 files out of 848000 files at second processing after successful first one, an unstable condition. Hasn't been reproduced since.

Quality Control

- **Fix:** There was an issue related to releasing locks after cancellation its acquisition on QC startup. Locks remained acquired after closing QC app. Fixed now.
